

TRAC Boosting Chassis Fleet Size by Ten Percent in New York Metro Pool

Princeton, NJ - August 4, 2014 - TRAC Intermodal, North America's leading intermodal equipment provider and chassis pool manager serving domestic and international shippers, is moving more than 2,000 additional chassis into the New York Metro Pool as it readies for growth.

"Adding these chassis demonstrates TRAC's commitment to the region," said Keith Lovetro, President and CEO of TRAC Intermodal. "TRAC is actively engaged in the Port's productivity initiatives and we want our customers to know what we are doing to increase the availability and physical condition of chassis in the NY/NJ Metro Pool." Those initiatives include:

1. **TRAC Chassis Refurbishment Program** - Restores out-of-service chassis to "like new" condition and injects higher-quality chassis back into the working fleet.
2. **TRAC Repositioning Program** - Moving up to 2,000 newer good-order chassis from other markets into NY/NJ.
3. **TRAC TITAN** -Manufacturing 130 NEW 40' TITAN chassis on the East Coast.
4. **TRAC Overtime Program** - A long-term commitment to improving the overall quality and availability of the Metro Pool fleet. Since mid-June TRAC has been paying overtime for M&R, daily and on the weekends, to reduce a backlog of out-of-service chassis.
